

As a consumer who listens to radio in my vehicle. I would resent very strongly any attempt to censor what I hear.
this is especially offensive if those who wish to stop my free choice are not doing so because of social reasons, but are doing so for commercial reasons.

While I have misgivings about any form of governmental censorship, I greatly resent those who attempt to stop my listening or hearing any form of speech for purely commercial reasons.

I urge you to not pass any legislation that attempts to stop any form of speech, be it broadcast or satellite.
